ERRA PATER.

A PROGNOSTICATION for ever,

made by *ERRA PATER.*

As I find in the Science of Astronomy, there be four manner of Cholers in Man's Body, of the four Complexions. The first is Blood; the second, black Choler; the third Flumes; the fourth yellow Choler: And if one of the four lack, all the Body will be forthwith dead: for one of them as much sustaineth the Body as the other.

And each of them ought to be at a certain, for if one of them surmount the other, all the body shall have damage thereby, and all four be perillous: for if the blood surmount the other, it will soon destroy and overcome the body, and make him die: for it gathereth, and likewise congealeth even right on the heart and the breath: and in that manner lessening by little and little, it overcome and dead; but all that time, when he great couse taketh him, it may soon be allwaged by taking away a little blood from him, for then all the peril will allwage.

Also the black Cholers be right perillous, and if they surmount the other, they do great dam-

mage to the Body, by many and others means, for they cause the Body to fail, by the Evil sickness, and to lose his wit and knowledge, and become a Fool; and they cause all the body to be full of evil scabs, and oft-times to be measl'd; and they make a Man to be fearful and a coward, of many ill manners. And by herbs, flowers, fasting, abstinence, drink and medicines they may be asswaged.

The Flumes that be white, be right perillous; also when they surmount the other Cholers of the Body, they do great lamage and hurt; for they engender Gouts, and many other evil sicknesses that be cold; and they also hurt the feet, the legs, the knees, the hands, the reins, and the teeth, and make the mouth, and breath stinking, and the nose and the ears; and causeth many other diseases and sicknesses. And they may be asswaged by herbs, flowers, roots, medicines, drinks, and by vomiting.

Also the yellow Cholers be perillous; for when they surmount the other Cholers in a man's body, they alloxvant the heart, and trouble the brain, and make all the members feeble and soft, and take away the will and appetite from the body, that it may neither eat nor drink; and also they change a man's colour, and make him to lose his sight and become blind. And they may be asswaged by herbs, flowers, roots, and by vomiting.

The four Humours be of four Complexions, and you have the domination of the body four times in the year.

of Erra Pater.

It is to be understood, that in the year are twelve months, and in the twelve months are two and fifty weeks, and in the two and fifty weeks are three hundred threescore and five days, and in three hundred threescore and five days, are contained eight thousand seven hundred and threescore hours.

A farthing a day is seven pence a month : the quarter of the year one shilling ten pence half penny farthing : the year seven shillings and seven pence.

A penny a day is two shillings four pence the month : the quarter of the year seven shillings seven pence : the year thirty shillings four pence.

A Rule to find when Shrove-Tuesday shall happen, and Easter, &c.

Observe when the Moon is new in February, the next Tuesday after is Shrove-Tuesday; but if it change on Tuesday, then the next Tuesday following is Shrove-Tuesday : the Sunday before Shrove-Tuesday is Shrove-Sunday.

The seventh Sunday after Shrove-Tuesday is Easterday ; and seven weeks after Easterday is Whit-Sunday : and the Thursday next before Whit-Sunday save one, is Ascension-day, or Holy Thursday.

The first part of the year that hath domination in the body of man, is three months

and these be their Signs, Capricornus, Aquarius and Pisces. And these three Signs have power over the Flumes in the Body of Man and Woman, and they are cold and moist, and they begin to reign the xxiii. of December, and dure till the xxvi. of March.

The disposition of the second part of the Year,
Aries, Taurus, Gemini.

The second part of the Year is other three Months, and these be their Signs, Aries, Taurus, and Gemini. And these have power in the body of Man, of the breast; and they be hot and moist, and they begin to reign the xxii. of March, and reign till the xxiii. of June.

The disposition of the third part of the Year,
Cancer, Leo, and Virgo.

The third part of the Year is other three months, and these be their Signs, Cancer, Leo, and Virgo. And they have power in the body of Man, of the yallow Cholera; and they be hot and dry. And they begin to reign the xxiv. of June, and dure to the xxvii. of September.

and Sagittarius. And they be cold and dry; and they begin to reign the xxiii. of September, and dure unto the xxiii. of December.

And by the manner of these four Seasons, every man may keep him from all the contraries of meats, drinks and cloathing, and from all other contraries. And if a man will keep himself after the manner which is rehearsed in this book, he shall never have infirmities of the Body, by the grace of God.

Take Pellitory of Spain, and chew it in the mouth; for it is good to purge the Head and Body. And eat Fennel-seed, and Cummin-seed: for each of these seeds destroy the Humours whereof all the Evils in any Mans Body come.

Here he shews of all the disinal or perillous Days that come in the Year.

Masters of Astronomy and Physick, that this craft first found, tell the most perillous and dangerous days in the Year; in which if
any

of Erra Pater.

any men or women be let blood of wound or bein, they shall die within one and twenty days following. Or whoso falleth into sickness on any of these days, they shall never escape it till they be dead. And whoso taketh any great journey in any of these days to go from home, he shall be in danger to die ere he comes home again. And whoso weddeth a wife in any of these days, they shall soon be parted, or else they live together with much sorrow. And whoso beginneth in any of these days any great work, it shall never come to good end: and those are the days following.

That is to say,

In January are eight days, that is to say, the first, the second, the fourth, the fifth, the tenth, the sixteenth, the seventeenth and the nineteenth. i.

In February are three days, the eighth, the ninth, and the seventeenth. ii.

In March are three days, the fifteenth, the sixteenth and the one and twentieth. iii.

In April are two days, the fifteenth and the one and twentieth. iiii.

In May are three days, the seventh, the fifteenth and the twentieth. v.

In June are two days, the fourth and the seventh. vi.

In July are two days, the fifteenth and the twentieth. vii.

In

The Prognostication

In August are two days, the nineteenth and the twentieth. viii.

In September are two days, the sixth and seventh. ix.

In October is one, the sixth. x.

In November are two days, the fifth and the nineteenth. xi.

In December are three days, the sixth, the seventh and the eleventh. Et alii dicunt, the fifteenth and the sixteenth. xii.

And whoso will learn the Canicular or Dog-days, which are days of great danger and peril, may know they begin the nineteenth day of July, and continue to the twenty eighth day of August, in which season it is very perillous to take sickness: and it is also perillous to take Drinks and Medicines, or to let Blood: But if there be great need, then it must be before the midst of the day.

Here begins the distance between the twelve Signs.

It is to be understood, that there is a circle in the Firmament, that is called the Zodiac, and it is divided into twelve even parts, and those parts be called the twelve Signs, and in Latin these are their Names: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricornus, Aquarius & Pisces.

These twelve Signs are in complexion like unto the four Elements: That is to say, the Fire the

of Erra Pator.

the Air, the Water and the Earth: the Fire is hot and dry: his Element is likened unto the Ram, the Lion and the Shooter; for these be hot and dry. Also the Air is hot and moist; his Element is likened unto the Children, the Balance and the Water-bearer; for they be hot and moist. The Water is cold and moist; and the Water is likened to the Crab, the Scorpion and the Fish. The Earth is dry and cold; to the Earth is likened the Bull, the Maid and the Goat, for they be dry and cold.

And every one of these Signs be divided into thirty even parts: these parts are called degrees, and every degree is divided into threescore even parts, and these parts are called minutes: and every minute is divided into threescore even parts, and these parts be called seconds: and so forth to the thirds and fourths.

It is also to be understood, that there are seven Planets, as Saturnus, Jupiter, Mars, Sol, Venus, Mercury, and Luna. These be the seven moveable Stars. The aforesaid twelve Signs take great power and might of the seven Planets, and the seven Planets take great power of the twelve Signs: for the Planets be to the Signs, as the Soul to the Body, and the Signs to the Planets, as the Body to the soul. For like as the Body can do nothing without the Soul, nor the Soul do any thing without the Body: no more may a Sign without one of the seven Planets.

Satur-

The Prognostication

Saturnus is the highest; and the next beneath Saturnus is Iupiter; beneath Iupiter, Mars; beneath Mars, Sol; beneath Sol, Venus; beneath Venus, Mercurius; beneath Mercurius, Luna.

The wise Philosophers say, it is from the Earth to Luna $\text{xx} \text{ M. vii} \text{ C. l.}$ miles.

From Luna to Mercurius is $\text{xii} \text{ M. viii} \text{ C. xii}$ miles and half.

From Mercurius to Venus as many.

From Venus to Sol is $\text{xviii} \text{ M. ix. C. xxxvii}$ miles.

From Sol to Mars is $\text{xx} \text{ M. vii} \text{ C.}$ and xxv miles.

From Mars to Iupiter is $\text{lxxviii} \text{ M. vii} \text{ C.}$ and xix miles.

From Iupiter to Saturnus as many.

From Saturnus to the Firmament is fiftyscore $\text{M. xiiii} \text{ C. lxxxv}$ miles.

The sum of all the miles is three hundred thirty eight thousand, four hundred, threescore and four miles.

Hereafter followeth a Conjunction of the Change of the Moon.

When the Prime is on the Letter A, the third day before the Prime, the nineteenth hour shall be the Change of the Moon, and you shall begin to tell your days at midnight; for a day natural is from midnight to midnight. When the Prime is on the Letter B. then the third

third day and fourth hour after midnight it shall change. When it is on the Letter C then it changeth on the fourth day and eighth hour. When it is on the Letter D. then the fourth day and the twentieth hour. When it is on the Letter E. the fourth day and eighteenth hour. When it is on the Letter F. the third day and sixteenth hour. When it is on the Letter G. then the third day and fourteenth hour.

The disposition of the xii Months for
blood-letting.

January.

In the month of January, let thee not blood on the first day, for it is perillous, nor the second day, nor the fifth day, nor tenth day, nor the fifteenth day, nor the nineteenth day, nor the twentieth day, nor the twenty fifth day; but as often as thou wilt drink good White-wine fasting; and also take good heed of the days that be above written, for they be perillous to bleed on, except the sign be right good for blood-letting.

February.

In the month of February, eat no Pottage made of Docks and Gallows, for they are venomous: And if thou hast need to bleed on thy wrist, or on thy arm, bleed not the fourth day, nor the sixth day, nor on the eighth day, nor on the sixteenth day, nor on the eighteenth day, but that the sign be very good; and then have great need.

The Prognostication

March.

In the month of March, eat figs, Raisins, and sweet meats and drinke, and eat hot meats, and let the blood on the right arm, on the fifth day, or on the twelfth day, or on the seventeenth day; for it is good against all manner of Fevers: but beware thou bleed not the first day, nor the fifteenth day, nor the sixteenth day, nor the nineteenth day, nor the eight and twentieth day, if thou mayest chuse; and if thou do, look the Signe be very good.

April.

In the month of April, bleed on the left arm on the third day: or on the eleventh day, or on the fifteenth day, and thou shalt have no great head-ach, nor lose thy sight of all that year: and use fresh and hot meat: but bleed not the seventh day, nor the eighth day, nor the tenth day, nor the twentieth day; for these days be not good for bleeding.

May.

In the month of May, rise early, and eat and drinke betimes, and use good meats and drinke; but eat neither of Head nor Feet while that lasteth: and let the blood on the first, or on the eighteenth day on which arm thou wilt, or on the twenty seventh day, or on the twenty eighth day, and it shall help thee against all man-

of Erra Pater.

manner of evil : But beware thou blæd not the third day, nor the sixth day, nor the five and twentieth.

June.

In the month of June, some Physicians say, that it is good every day to drinke a quantity of cool water fasting, and rule thee of thy meat and drinke : and if thou have need, blæd on the twenty eighth day, for that is good : but beware that thou blæd not on the seventh day, nor on the tenth day, nor on the fiftēnth day, nor on the sixteenth day, nor the twentieth day.

July.

In the month of July, keep thee from Lecherie ; for then the Veins and Humours are alwayes open : and blæd not in this month, but if thou have great Need ; and then beware alwayes that thou bleed not on the thirtēnth day, nor on the fiftēnth day, for it is dangerous.

August.

In the month of August, eat no manner of worts, nor any manner of hot meats and drinks of spicery : nor blæd on the first day, nor the twentieth day, nor the twenty ninth day, nor the thirtieth day : the other days thou mayest blæd for great Need if the Sign be good for blood-letting ; but not else, if thou love to keep thy body in good health.

Sepe

The Prognostication

September.

In the month of September, all manner of fruit that is ripe and not infected, is good to eat: and bleed not the third, nor the fourth, nor the sixteenth, nor the one and twentieth, nor the two and twentieth day; but bleed on the seventeenth or eighteenth day for the dropsie, phrensie, palseie, or the falling-euil, and bread thee not all that year after any of them.

October.

In the month of October, drink good and wholesome wine, and bleed not except great need make thee, but look that the sign be very good: and yet beware that thou bleed not on the third day, nor on the sixth day, nor on the fourteenth day, and thou wilt do well.

November.

In the month of November, bleed not but for need, for all the blood is gathered that time upon the head-vein: bathe not, but vent thee a little of grasse; for then all the humours be overquick to bleed: and if cause be that thou have great need for to bleed, beware of the fifth day, the sixth day, the fifteenth day, the nineteenth day, the twenty eighth day, and the twenty ninth day.

December.

In the month of December bleed not but if thou have great need for thy health. And in case thou hast much need to bleed, beware of the fifth day, the seventh day, the fifteenth day

of E-ra Pater.

day, the seventeenth day, and the two and twentieth day: but bless on the six and twentieth day, for that is not hurtful. And in this month come not nigh the fire with thy thanks.

A Rule to know and understand the year that shall be plenteous, and in great Abundance of Goods.

In die Dominica, that is, Sunday.

In the year that January shall enter on the Sunday, the Winter shall be cold and moist, the Summer shall be hot and rainy, with great abundance of Corn, of Wines and other Grains, and of all Garden-Fruits and Herbs: there shall be little Dill, abundance shall be of all manner of flesh: some great news shall men hear spoken of Kings and Prelates of the Church, and also of great Princes, great Wars and Robberies shall be made, and many young people shall die.

In die Luna, that is, Monday.

In the year that January shall enter on the Monday, the Winter shall be peaceable enough, and the Summer shall be very temperate. There shall be great floods of Waters that shall break out of their limits and bounds, and many Ships upon the Sea shall perish, and in that year shall reign divers sicknesses, and changes of great Lords shall be made: many women shall perish in travelling with child,

The Prognostication.

many great Lordes shall die. That year there shall be but little Grasse and Mustard-seed, nor but little Oyl: but there shall be plenty of Corn and Wines, and flesh shall be good cheap.

In die Martis, that is Tuesday.

In the year that January shall enter on the Tuesday, the Winter shall be steadfast and unchangeable: For without all doubt it shall freeze in the prime, which shall hurt sore the Rye, the Wines, and the Flowers, the Summer shall be dry, hot, and burning, insomuch that the Garden-herbs shall have no power to come out of the ground. All things shall be dear save only Corn: many men shall die of the bloody-flux: there shall be no tidings of thunder, lightning, nor tempest; but all flesh shall be very dear; many Wines shall this year turn, and so be nought.

In die Mercurii, that is, Wednesday.

In the year that January shall enter on the Wednesday, the Winter shall be temperate; but in the end there shall be snow and frosts: The prime time shall be rainy: there shall be great abundance of Grasse, of Hay, of Corn, of Fruits, of Wines, and generally of all good things. The Summer shall be little cloudy, by which shall come great sickness. Poor Labourers as Handy-craft and Artificers, shall gain meely well that year. There shall be many Thieves, by whom the mean people shall be sore pillaged and discomfited: great war, battle and slaughter, shall

of Erra Pater.

shall be towards the middle of the year, by the which shall come great good to some men, in the end of the year shall be divers Pestilences, Botches, and falling Colles, especially near the Sea.

In die Jovis, that is, Thursday.

In the year that January shall enter on the Thursday, the Winter shall be long and most part dry, and the year shall be very wholesome. The prime time shall be wholesome, and very windy: the Summer shall be temperate, and Harvest shall be most part rainy, so that the waters shall sore break out of their bounds: the Wheat and Wines shall be good cheap: there shall be of Oats, Hay, Grass, and of Fruits, competently enough. Great war and divisions shall be between the Church and the Kings and Princes, and in the end the Princes shall have victory over their Enterprizes. This year women shall set themselves much to lechery; also people shall be well eated of Taxes and Tollages.

In die Veneris, that is, Friday.

In the year that January shall enter on the Friday, the Winter shall be long and dry, and the Summer unwholesome: Harvest shall be dry, all Corn shall be dear: the Wintage shall be good enough, and abundance of Oyl, of Fruits, of Hay, of Grass, and Garden herbs: the world shall be sore persecuted with divers sicknesses, as sore eyes: and of the like many young Chil-

The Prognostication.

Men shall die, great Thunder, Lightnings, and Tempests shall be, that shall grieve sore all the ground: there shall be Earthquakes: all Cloth shall be good cheap: poor people shall gain little or nothing: many beasts shall die by hunger through the scarcity of the same.

In die Sabbati, that is, Saturday.

In the year that January shall enter on the Saturday, the Winter shall be temperate sufficiently, and the Prime time shall be Frost, the which shall destroy the Trees, the Vines, the Oyls and the Fruits. The Summer shall be meetly temperate: the Harbest-time shall be good cheap: of Garden-herbs shall be plenty: all Flesh shall be good cheap: many old people shall die: Fever tertians shall grieve sore the World: and many Murmurations, Wars and Furbthers shall be done by one against another, and Neighbours against Neighbours, and many other evil Acts shall be oftentimes committed and done.

Of the signification of Thunder on every day of the Week.

If it thunder on the Sunday, there will be a great death of Clerks and Judges, and also perverse People by signification.

If on the Monday, it chance to thunder, many Women shall die then, and the Sun will suffer Eclipse by signification:

of Erra Pater.

If it thunder on the Tuesday, it betokeneth great plenty of Corn.

If on the Wednesday it chance to thunder, it betokeneth that year Common women and light Wenches shall die, and then shall be great bloodshed.

If it thunder on the Thursday, then shall be very cheap and much plenty of Corn.

If on the Friday it chance to thunder, it betokeneth that a great man shall be slain, and others other murders, and other evils.

If on Saturday it chance to thunder, it betokeneth that there shall be a great general pestilent plague, whereof many shall die.

The Saying of *Erra Pater* to the Husband-man.

IF the day of Saint *Paul* proves clear,
Then shall beride a happy Year:
If it chance to snow or rain,
Then shall be dear all sorts of Grain:
But if the Wind then be aloft,
Wars shall vex this Realm full oft:
And if the Clouds make dark the Skie;
Both Neat and Fowl this year shall die.

The Prognostication

Here followeth a Rule to know
when the Terms begin and end,
with their Returns

Hilary Term beginneth the 23 of January,
and endeth the 12 or 13 day of February,
and hath four Returns, that is, Oct. Hil. Quin.
Hil. Cra. Pur. Oct. Pur.

Easter Term beginneth 17 days after Easter-
day, and endeth the Monday next after Ascen-
sion-day, and hath five Returns, that is, Qui.
Pasc. Tre. Pasc. Pent. Pasc. Qui. Pasc. Cra.

Eight days before any Term begins, the Ex-
chequer openeth, except Trinity; for then it o-
peneth but four dayes before.

A Table

A Table to know how long the Moon shinerh, and when she riseth and setteth.

Moon's age increasing.	The ho urs she shines.	Her age decreasing.

The use of this Table is this: The age of the Moon once known, and found in the side of the Table, then answering thereto shall ye see the hours & minutes of her shining, to be counted from the Sun-setting, all the encreasing till the full, and till then she shineth in the evenings; and after the full she shineth before the Sun-rise in the morning, so many hours before the Sun-rise as the Table sheweth. And for her rising and setting do thus all the encrease: Add to the hour of the Sun-setting the hours found in the Table, and it sheweth the hour of her rising. Again, add to the hour of the Sun-setting the hours and minutes found in the Table, and that is the hour of her setting. Then after the full, for her rising do thus: From the Sun-rising, take the hours found in the Table, & the rest sheweth the rising; and from the hour of the Sun-setting, take the hours found in the Table (borrowing twelve, if this subtraction cannot else be made) and the rest sheweth the setting of the Moon.

The glorious Planet Venus is our Morning Star, until the 26th Day of January, at which time passing her Conjunction with the Sun she becomes our Evening Star, to the 11th day of November; afterwards to the years end is our Morning Star again.

This Table shews the Interest of any sum of Money from 1 s. to 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any Sum whatsoever. And note, that for the greater exactness the penny is divided into 100 Parts; so that 25 Parts are a Farthing and 50 parts an half-penny, and 75 Parts three Farthings, &c.

Example.

The Interest of 100 l. for six Months one Week and one day, thus is found by the Table.

Interest of 144 l. { for 6 mon. 03-0-0-00 } l. s. d.
 { for 1 week, 00-3-3-61 } viz. 3-2-7 half-penny.
 { for a day, 00-0-3-94 }
